NEED HELP

The Building Project has advanced to the point where we are doing construction and mechanical specifications via our architectural firm. I have listed four functions that must be accomplished **AS SOON AS POSSIBLE** in order to create the plans for our New Council Home.

If you have the necessary skills and experience, and would like to save **your** Council some money, please contact Jerry Cole ASAP at bear07726@yahoo.com or 732-446-1470. If you cannot assist us but know someone who has the necessary skills and would like to donate their time, please ask them to contact me. They do not have to be a Knight.

FUNCTIONS

Main Bar: We need an **Interior Designer** with bar equipment layout and finishes experience. Design drawings and equipment specifications will need to be provided so they may be incorporated into the Architectural drawings.

Kitchen: We need a quasi **Kitchen Consultant**. Someone who has experience in Kitchen layouts. The services shall include recommendations of required equipment selections with specifications, equipment layouts and drawings/sketches shall be provided indicating all the utility service requirements with dimensional data.

Security System: We need someone who can **design and specify** a security system and provided layouts on all equipment locations, mounting details and utility requirements. This system may want to be connected to the fire alarm system.

Lawn Sprinklers: We need someone who can **design and specify** a lawn sprinkler system and provided layouts on all required equipment, control panel and zone valve recommended locations and utility requirements.

K of C Lawn Sign: For now, we need to get a **preliminary sign design** with specifications and mounting details in order to incorporate the requirements into the Architectural and Site packages.

THIS IS YOUR CHANCE TO GET INVOLVED
